

---

**1. Professor:** M. ALAIN THOUVENIN

**2. Overview and objectives**

Before the negotiation, the students will have to identify:

- the different parameters to lead a winning negotiation
- the right arguments to prepare

During the negotiation they will have to analyse the balance of power when they will face the client and lead a win to win negotiation

**3. Targeted skills**

- Identify the different industrial sectors and the type of negotiation
- Identify the different cultures where negotiation takes place
- Develop arguments and to face the objections

**4. Prerequisites**

None

**5. Level:** Master 1

**6. Course description and plan**

1) How to convince a customer and how to lead successful selling discussion? (15h)

The four groups of producers

Before to negotiate you have also to consider the type of strategy of the manufacturer and the risk

- First strategy of the manufacturer
- Second strategy
- Third strategy

Another aspect to be considered is the type of products offered to the client

- Strategic products
- Medium products
- Basic products

1.1) How to negotiate the three types of products?

The negotiator must also analyse the balance of power between the supplier and the client

- When has the supplier the strong position?
- When has the negotiator the strong position?

1.2) How must a supplier fight to keep his selling price?

2) Negotiation in an international context (15h)
